

Article Overview

Affordable and durable cable trays in East Africa are available from suppliers like TDK Networks Kenya, Hutaib Electrical, and Ned-Tech, offering galvanized, stainless steel, and aluminum options.

Key Suppliers in East Africa

TDK Networks Kenya provides a wide range of cable trays suitable for industrial, commercial, and IT projects. They offer galvanized steel, stainless steel, and aluminum trays in ladder, mesh, ventilated, and solid-bottom designs. Standard sizes include lengths of 8 feet (2.44 meters) and widths from 25mm to 100mm, with thicknesses ranging from 0.6mm to 3.0mm. TDK also supplies accessories like bends, elbows, and tees, and can customize trays to project specifications, making them a cost-effective choice for local projects in Kenya and East Africa. Hutaib Electrical is a South Africa-based manufacturer with distribution across Africa. They produce ladder, perforated, basket, and solid-bottom cable trays, along with all necessary accessories. Their products are available in finishes such as GI hot-dip, pre-galvanized, powder-coated, and stainless steel (SS 202/304/316). Hutaib Electrical emphasizes quality and prompt delivery, offering customized solutions that can suit both small and large-scale projects. Ned-Tech, based in Nigeria, serves multiple African markets including West and East Africa. They provide perforated, ladder, and solid-bottom cable trays made from galvanized steel, stainless steel, and aluminum. Ned-Tech focuses on affordability without compromising durability, offering fast delivery and technical support for industrial, telecom, energy, and government projects.

Types and Materials

- o Materials: Galvanized steel (most common and cost-effective), stainless steel (corrosion-resistant), aluminum (lightweight and durable)
- o Tray Types: Ladder trays, perforated trays, mesh trays, solid-bottom trays
- o Accessories: Bends, elbows, tees, reducers, junction boxes

Considerations for Affordability

- o Local Sourcing: Purchasing from East African suppliers reduces shipping costs and import duties.
- o Material Choice: Galvanized steel is generally the most affordable while still durable for most environments.
- o Customization: Standard sizes are cheaper; custom trays may increase cost but improve installation efficiency.
- o Bulk Orders: Larger orders often qualify for discounts and faster delivery. By selecting suppliers like TDK Networks Kenya, Hutaib Electrical, or Ned-Tech, you can access affordable, high-quality cable trays suitable for a variety of East African infrastructure and industrial projects.
