

# Can a network rack house a server

## Preview

The server rack is designed to house, organize and secure servers, networking equipment and other IT hardware. Choosing between a network rack vs server rack might seem like a minor detail during a buildout, but picking the wrong one creates real problems. Poor airflow leads to overheating. Unlike desktop or tower servers that sit on the floor, a rack server is built to fit horizontally in a standardized 19-inch-wide rack. IT server racks are generally used in data centers, offices and home setup for. Choosing between a server rack and a network rack defines the performance, scalability, and safety of your IT infrastructure. This guide shows you exactly what to install in your rack and how to build a clean, reliable setup at home.
