

Can using a high-speed router with a low-speed fiber optic connection improve performance

Preview

Yes, you can use your own router with fiber internet, as long as it has a Gigabit Ethernet WAN port to connect to your ISP's Optical Network Terminal. Upgrading to a Wi-Fi 6 or 6E router helps you get the full benefit of symmetrical fiber speeds. Before diving into the role of routers, it's essential to understand what determines. In this guide, we'll explain router compatibility, setup steps and whether upgrading your router is necessary to maximize fiber speeds. This guide will break down everything you. On one hand, a high-quality router can improve network efficiency by optimizing data transmission, reducing congestion, and minimizing errors.
