Steel/Copo-Tapes consist of low carbon; chrome coated steel coated uniformly with copolymer film on both sides with perfect lamination and is used for corrugation shield in fiber optical cables. Buy Chrome Steel Tape China Direct From Chrome Steel Tape Factories at Alibaba. Help Global Buyers Source China Easily. The copolymer exhibits excellent adhesion to the steel substrate and has the chemical resistance and general characteristics of lower density polyethylene, it bonds to low, linear low. Copolymer Coated Steel Tape, consist of a steel tape coted on both sides with green color adherent ethylene copolymer. The copolymer substrate exhibits excellent adhesion to steel. It can adhere to Low (LDPE), Linear Low (LLDPE), Medium (MDPE) and High (HDPE) density polyethylene. The steel is cold rolled, low. Steel Tapes are unique materials for the Optical Fiber and special cable applications which need specific properties on armouring function to prevent external forces and anti-corrosion function for the longest life underground conditions.

Steel/Copo-Tapes consist of low carbon; chrome coated steel coated uniformly with copolymer film on both sides with perfect lamination and is used for corrugation

The copolymer substrate exhibits excellent adhesion to steel. It can adhere to Low (LDPE), Linear Low (LLDPE), Medium (MDPE) and

Buy Chrome Steel Tape China Direct From Chrome Steel Tape Factories at Alibaba.com. Help Global Buyers Source China Easily.

DX-Series Distribution Cable series with corrugated steel tape (CST) armor. Ideal for installation where direct burial or rodent protection is required. The steel

Polycab's Uni-Tube ECCS Tape Armoured Cable with 2 FRP rods offers durable and efficient fiber optic connectivity for various applications.

Our Plastic Coated Steel Tape offers excellent moisture resistance, mechanical protection, and flexibility. Base Material: Chrome-Plated Steel Tape / Stainless Steel Tape

Chrome-plated steel tape for optical cable

Copolymer Coated Steel Tape 1. Application Copolymer coated steel tape is used for communication optical Cable and shielding cable and waterproof cable. 2.

The copolymer coated (ECCS) steel tape is made from high quality cold rolled steel tape and the copolymer film is made from EAA material with excellent heat seal.

CCST consists of a steel tape coated on both sides with adherent ethylene

Shanghai Metal Corporation is a trusted Copolymer Coated Steel Tape for Cable Armoring supplier in china, we have extensive inventory of Copolymer Coated

Insulation: With its high-temperature resistance, this steel tape provides reliable insulation for the optical fiber cable. Shielding: The copolymer coating enhances

Buy Steel Tape Longitudinal Layer - Stranded Optical Cable FR-PE at the best price from Norden Communication, the global manufacturer and supplier of electrical and optical solutions. Choose

Electro chromium-coated steel or ECCS tape is a common material used by manufacturers for shielding and armouring optical fiber cables.

Steel Tapes are unique materials for the Optical Fiber and special cable applications which need specific properties on armouring function to prevent external forces and anti-corrosion function for the longest

APPLICATION Leviton Steel-Tape Armored Unitube cables offer up to 24 fibers in a compact cable construction. The range has been designed to offer enhanced mechanical properties over the Duct
