

Article Overview

The cost of ground cable tray cabling typically ranges from \$2 to \$50 per meter, depending on tray material, type, and grounding wire specifications.

Cable Tray Costs

The price of cable trays varies significantly based on material, design, and size:

- o Steel trays: \$5-\$25 per meter, durable and widely used for general installations .
- o Aluminum trays: \$6-\$30 per meter, lightweight and corrosion-resistant, ideal for outdoor or humid environments .
- o Fiberglass (FRP) trays: \$10-\$50 per meter, suitable for aggressive chemical or high-moisture environments .
- o Stainless steel trays: Higher-end option for extreme durability and corrosion resistance, often used in heavy-duty industrial settings . Tray type also affects cost: ladder trays are more expensive but support heavier cables, while perforated or wire mesh trays are cheaper and suitable for lighter loads . Additional costs include supports, brackets, connectors, and labor, which vary by installation complexity and location .

Grounding Wire Costs

Grounding is essential for safety and system reliability. The cost depends on the material and installation method:

- o Copper wire: Excellent conductivity, more expensive.
- o Hot-dip galvanized steel: Durable and corrosion-resistant, moderately priced.
- o Stainless steel: High corrosion resistance, suitable for harsh environments . Installation methods include full-length grounding conductors, using the tray itself as a conductor (for metal trays), or connecting at joints with bolts or welds . Labor costs for grounding depend on tray length, accessibility, and local electrician rates.

Total Cost Considerations

When budgeting for ground cable tray cabling, consider:

- o Material choice (tray and grounding wire).
- o Tray type and size (ladder, perforated, solid-bottom).
- o Installation complexity (supports, height, building structure).
- o Labor and regional wage differences.
- o Additional accessories (connectors, brackets, fasteners). For a rough estimate, combining tray and grounding wire, expect \$10-\$60 per meter for standard installations, with higher costs for specialized materials or

challenging environments . Bulk orders or large projects may reduce per-meter costs.

This guide for engineers and installers has been developed by ABB as a practical reference regarding cable tray characteristics,

The main purpose of grounding is safety. Without it, electrical faults like power surges could cause fires, shocks, or
