

Complete Price List for China Unicom Six-Core Optical Cable

Article Overview

The price of China Unicom six-core optical cables varies widely based on fiber type, jacket material, armor, installation method, and order quantity, with bulk and OEM orders offering the most competitive rates.

Key Factors Affecting Price

- o Fiber Type and Mode: Single-mode fibers are generally more expensive than multimode due to lower attenuation and longer transmission distances. Premium brands like Corning or YOFC cost more than local Chinese brands, which may be 10-15% cheaper but could have higher bending loss over time .
- o Cable Structure and Jacket Material: Outdoor, armored, or ADSS cables are more expensive than simple indoor cables. Polyethylene jackets for outdoor use add durability and weather resistance, which can increase cost .
- o Order Quantity and Customization: Bulk orders and OEM customization reduce per-meter cost. Factories often provide better pricing for large-scale projects, especially when specifications, drum length, and packaging are clearly defined .
- o Testing and Certification: Cables with factory test reports, tensile strength verification, and compliance with international standards may carry higher prices but ensure reliability for critical applications .

Typical Procurement Process

- o Define Application: Determine whether the cable is for FTTH, data centers, campus networks, or outdoor long-haul deployment .
- o Specify Parameters: Include fiber mode, core count (six-core), jacket type, armor, tensile strength, and drum length.
- o Request Quotes: Contact verified suppliers or distributors such as PUYANG YRT Communications, Acrel, or Guangzhou Jiabei for tailored pricing .
- o Compare Offers: Evaluate based on price, delivery time, quality standards, and after-sales support.

Price Range Guidance

While exact prices fluctuate with specifications and market conditions, six-core optical cables from Chinese suppliers typically range from \$0.50 to \$2.50 per meter for standard single-mode or multimode cables, with higher-end armored or outdoor cables costing more. Bulk orders and factory-direct purchases can significantly reduce costs .

Recommended Suppliers

- o Made-in-China.com and Alibaba.com list multiple verified manufacturers and distributors for China Unicom
