

Article Overview

Several manufacturers specialize in custom-made bushings for distribution boxes, offering tailored solutions in steel, bronze, Babbitt, and other materials with precise machining and ISO-certified quality.

Leading Manufacturers

B&B Manufacturing provides custom-engineered bushings, including tapered and QD(R) bushings, with a variety of stock options and kits in steel or stainless steel. They offer 3-D models and downloads to facilitate design integration and are ISO-certified for quality assurance . Sibb Bushings specializes in custom steel bushings, producing components with specific grooves, depths, and geometric modifications to meet exact customer requirements. Their production uses advanced CNC and robotic systems for precision and consistency, supporting applications in industrial, agricultural, and earthmoving sectors . Quad Industries manufactures precision steel-backed Babbitt bushings and other metal bushings ranging from 1" to 12" in diameter. They offer custom features such as partial or fully drilled holes, groove patterns, wall thickness variations, and optional electroplating for wear and corrosion resistance. Their in-house engineering ensures long service life and reliable performance . Keats Manufacturing produces metal-stamped and machined bushings for high-load and high-impact applications. They provide custom bushings using CAD/CAM, EDM, and CNC technologies, with in-house tooling for rapid design modifications. Their ISO-certified facilities support cost-effective, high-precision production with just-in-time delivery .

Key Considerations for Custom Bushings

- o Material Selection: Steel (carbon, alloy, stainless), bronze, Babbitt, aluminum, or composite materials depending on load, wear, and environmental conditions .
- o Customization Options: Grooves, drilled holes, wall thickness, surface treatments, and electroplating to enhance durability and compatibility .
- o Certifications: ISO 9001, ISO 14001, and TSI 16949 certifications ensure quality and reliability .
- o Application Fit: Manufacturers can assist in defining tolerances, housing fits, and feasibility studies for heavy loads, irregular motion, or harsh conditions . For sourcing custom-made distribution box bushings, contacting these manufacturers with technical drawings or specifications will help ensure the bushings meet your exact requirements.

347 Bushing Manufacturers in 2026 This section provides an overview for bushings as well as their

A made-to-order bushing is a custom component designed to meet specific customer needs. Commonly used

Custom-made distribution box bushing manufacturer

as bearings or linings,

At Triangle Machine Products, we specialize in manufacturing high-quality steel and custom metal

Power Distribution Boxes Manufacturer Custom power distribution boxes featuring precise sheet metal

Custom Drill Bushings To standardize is to Economize -- Always try to order a standard bushing Where possible, ACME will modify

We manufacture custom-machined bushings to handle high loads, provide friction resistance, offer heat insulation, and inhibit

Customized. Excellence. Unique. Professional Solutions Product Offering Wall Plates, Panels, Electrical

EWJ are a professional metal enclosure manufacturer providing electrical enclosures, aluminum

At E-abel, we manufacture custom electronic enclosures that meet the exact requirements of your project. We offer customization

Both inch and metric DIN bushings are available to meet your requirements. Our bushings styles range from Guided Ejection, Die

Choose between a Press-Fit or Head Press-Fit Bushing type, indicate product dimensions and material to determine the ANSI part

Bushings Manufacturing Bushings are commonly produced using stainless steel; however, they can be

The leading manufacturer of standard inch and metric sleeve bearings and bushings in the world. Custom Quote: 1-800-969-2721,

Precision OEM bushings in bronze, Babbitt & aluminum for industrial machinery. Quad Industries

Your products deserve custom packaging boxes crafted with sustainable materials, impeccable print quality, and picture-perfect

Custom bushings and off-the-shelf bushings are made from various materials including metal, ceramic,
