

Dimensions of Stainless Steel Electrical Distribution Boxes in Mauritius

Article Overview

Stainless steel electrical distribution boxes in Mauritius come in a wide range of sizes, typically from small 2-module boxes to large enclosures exceeding 72 modules, with wall-mounted and weatherproof options available.

Standard Sizes and Module Capacities

- o Small Boxes: 2 to 6 modules, suitable for compact residential or small commercial installations, often with IP30-IP65 protection .
- o Medium Boxes: 12 to 36 modules, commonly used for larger residential or light industrial setups. These may include surface or flush mounting options and often feature removable mounting plates for easy installation .
- o Large Boxes: 48 to 72 modules, designed for industrial or commercial applications requiring multiple circuits. These enclosures are typically stainless steel, IP65-rated for outdoor use, and compatible with DIN rail mounting .

Material and Protection

- o Stainless Steel Grades: Commonly 1.4301 (V2 A) or 1.4404 (V4 A), providing corrosion resistance and durability in harsh environments .
- o IP Ratings: IP65 or higher for outdoor and industrial applications, ensuring protection against dust and water ingress .
- o Mounting Options: Wall-mounted, surface-mounted, or flush-mounted, often with removable galvanized mounting plates for flexibility .

Special Features

- o Weatherproof and Tamper-Resistant: Many stainless steel boxes include reinforced hinges, lockable doors, and sloped roofs to prevent water accumulation .
- o Customizable Interiors: Modular interiors allow for DIN rail installation, terminal blocks, and cable management, suitable for solar panels, CCTV systems, or industrial control equipment .
- o High-Temperature Resistance: Some enclosures are self-extinguishing up to 650°C, suitable for industrial safety standards .

Summary

In Mauritius, stainless steel electrical distribution boxes are available in compact 2-module sizes up to large

Dimensions of Stainless Steel Electrical Distribution Boxes in Mauritius

72-module enclosures, with IP65 weatherproofing, wall or flush mounting, and durable stainless steel construction. They are suitable for residential, commercial, and industrial applications, offering flexibility in installation and protection against environmental hazards .

According to national standards, the wall thickness of the low-voltage distribution box should not be less than 1. Designed for safety
