

Electrical Distribution Box Installation and Teaching Price

Preview

New panel box pricing typically ranges from about \$150 to \$1,900 for parts and labor, with most residential projects landing between \$450 and \$1,500 depending on amp rating, gauge of wiring, and labor complexity. Understanding distribution box cost involves examining the comprehensive investment required for electrical distribution systems that serve as crucial infrastructure components in residential, commercial, and industrial settings. Typical costs are driven by box type, material (plastic vs metal), and whether the box is new construction or a retrofit. Junction box cost can vary much more than many buyers expect. This article breaks down typical price ranges and driving factors to help homeowners and contractors budget effectively. This guide covers everything from building a price book to presenting quotes that win jobs without leaving money on the table. For larger electrical jobs like installing wiring or replacing an electrical panel, expect to pay \$2,000 to \$6,000. Get free estimates from electricians near you or check out our pricing guide below.

Prices for electrical boxes vary by size, material, and installation needs. Typical costs are driven by box type, material (plastic vs metal), and whether the box is new construction or a retrofit.

The cost breakdown below uses indicative ranges and common components for new panel box installations or upgrades. The table mixes totals with per-unit estimates to aid budgeting.

For standard residential installations, the typical cost to replace or install an electrical meter box ranges from \$600 to \$2,000, with most projects falling near \$1,000 to \$1,400.
