

Article Overview

An empty fusion splicer case is a durable, portable storage solution designed to safely hold a fusion splicer and related fiber optic tools.

Overview

Empty fusion splicer boxes are designed to store and protect fiber optic tools such as cutters, wire strippers, optical power meters, and pens. They are typically made from high-strength plastic or reinforced materials to prevent damage during transport or fieldwork . These cases are lightweight yet sturdy, making them suitable for telecom maintenance, CATV, lab testing, and other fiber optic applications .

Common Features

- o Dimensions: Sizes vary, for example, 33 x 20 x 21 cm or 45 x 33 x 24 cm, accommodating most standard fusion splicers .
- o Weight: Lightweight, usually around 2-3 kg, for easy portability .
- o Compartments: Designed to securely hold small tools and accessories, often with customizable internal sections.
- o Durability: High-strength plastic or reinforced materials protect the splicer from shocks and environmental damage .
- o Portability: Equipped with handles or straps for easy carrying in the field .

Applications

- o Telecom and data network maintenance
- o Cable television (CATV) installations
- o Fiber optic lab testing and measurements
- o Field splicing operations

Purchasing Options

- o Glass Fiber Optic Cable Store offers empty fusion splicer tool boxes with a production lead time of 3-5 working days and customization options for bulk or retail orders .
- o Alibaba provides original new fiber optic fusion splicer tool boxes suitable for portable storage .
- o FONGKO sells high-quality optical fiber welding machine packing cases that are empty and designed for splicer protection .
- o Amazon and other online marketplaces offer portable carrying cases compatible with various fusion splicer models, often with padded interiors and handles for convenience . These empty cases are ideal for technicians
