

Article Overview

Reliable manufacturers of hot-dip galvanized cable trays include Artim Metal, Superfab Inc, JLH Electric, and Parco Engineers, offering durable, corrosion-resistant solutions for industrial and outdoor applications.

Key Manufacturers and Offerings

Artim Metal produces a wide range of hot-dip galvanized cable trays, including 40, 50, 60, 70, and 75 Series perforated trays. These trays are designed for industrial, infrastructure, and outdoor applications, providing high corrosion resistance, long-lasting durability, and optimized airflow for heat dissipation. Their products are suitable for heavy load carrying and offer easy installation with robust channel covers and holders . Superfab Inc offers hot-dip galvanized cable trays coated with a thick zinc layer, ensuring enhanced protection against corrosion, harsh weather, and industrial conditions. Their trays are ideal for indoor and outdoor installations, including power stations, industrial plants, and infrastructure projects. Superfab provides various sizes and configurations, supporting efficient cable management and low maintenance . JLH Electric manufactures hot-dip galvanized trunking and cable trays in custom thicknesses and sizes, ranging from 25-200 mm in depth and 50-1000 mm in width. Their products comply with BS EN 10346:2009 standards and are ISO9001 and CE certified, ensuring high-quality construction and long-term performance in harsh environments. The trunking is fully enclosed, providing protection against moisture, dust, and other contaminants . Parco Engineers specializes in perforated hot-dip galvanized cable trays, which allow for better airflow and cooling of cables. Their trays are suitable for commercial, industrial, and infrastructure projects, offering excellent corrosion resistance, durability, and minimal maintenance. The perforated design also supports flexible configurations with bends, tees, and vertical sections .

Considerations for Ordering

- o **Material and Coating:** Hot-dip galvanizing provides superior corrosion resistance compared to powder-coated trays, making it ideal for outdoor or harsh industrial environments .
- o **Design:** Perforated trays improve airflow and heat dissipation, while solid or covered trays offer additional protection for sensitive cables.
- o **Load Capacity:** Ensure the selected tray series supports the weight of your cable installation.
- o **Customization:** Many manufacturers offer custom sizes, lengths, and accessories like couplers and covers for specific project requirements.
- o **Certifications:** Look for ISO, CE, or relevant national standards to ensure quality and compliance. For ordering, you can contact these manufacturers directly through their websites to request quotes, product specifications, and delivery options. This ensures you select a durable, corrosion-resistant, and project-appropriate cable tray solution.

Hot-dip galvanized cable tray manufacturers supply

Custom Hot Dipped Galvanized Cable Ladder for Sale. Contact JLH Electric For Quality Cable Tray In

Hot Dip Galvanized Cable Tray and Ladder Suppliers in Dubai & UAE BonnGulf is a trusted manufacturer
