

Article Overview

Cable trays in China typically cost between \$2 and \$25 per meter, depending on material, type, and finish.

Price Range and Factors

The cost of a cable tray in Jianli will largely depend on material, design, and supplier. Common price ranges per meter are:

- o Galvanized steel trays: \$5-\$15, balancing durability and cost
 - o Stainless steel trays: \$15-\$25, corrosion-resistant but more expensive
 - o Aluminum trays: \$10-\$20, lightweight and rust-proof
 - o Plastic trays: \$2-\$8, budget-friendly but suitable only for light loads
- Tray type also affects cost: ladder trays are more expensive due to higher load capacity, while wire mesh or perforated trays are cheaper and ideal for lighter cabling .

Additional Cost Considerations

- o Coatings: Hot-dip galvanized (HDG) or powder-coated trays increase durability but raise upfront costs
- o Order quantity: Bulk purchases can reduce per-meter cost significantly
- o Shipping and labor: Jianli is inland, so transportation from coastal manufacturers may add to the total cost
- o Customization: OEM or custom-sized trays may increase price but ensure compatibility with specific installations

Sourcing in Jianli

Although Jianli does not have widely listed local suppliers online, buyers can source cable trays from Chinese manufacturers and wholesalers via platforms like Made-in-China, Alibaba, or Tradewheel, which offer factory-direct pricing and volume discounts . Contacting suppliers directly allows for quotes tailored to material, size, and quantity, which is the most accurate way to determine final costs. In summary, for a standard project in Jianli, expect \$2-\$25 per meter, with the final price influenced by material, tray type, coating, and order size. For large-scale or specialized installations, requesting custom quotes from verified Chinese suppliers is recommended.
