

How much does it cost to install a cable tray tee

Article Overview

Cable tray tee installation costs typically range from \$15 to \$50 per meter for materials, with labor and installation adding \$20 to \$60 per meter depending on complexity and environment.

Material Costs

The price of a cable tray tee depends on the material and type of tray used. Common options include:

- o Pre-galvanized steel (PG): Most affordable, suitable for dry indoor areas, generally \$15-\$25 per meter equivalent .
- o Hot-dip galvanized steel (HDG): More durable for outdoor or industrial environments, slightly higher cost due to thicker zinc coating .
- o Aluminum: Lightweight and easier to handle, costs more upfront but reduces labor for supports, typically \$25-\$40 per meter .
- o Stainless steel: Highest durability and corrosion resistance, often \$40-\$50 per meter or more . Additional components like connectors, brackets, and supports for the tee fitting can add to the material cost, usually 10-15% of the tray price .

Labor and Installation Costs

Labor costs vary based on installation height, complexity, and project environment:

- o Standard indoor installations: \$20-\$30 per meter.
- o Elevated or hard-to-access areas: \$40-\$60 per meter due to scaffolding, safety measures, and additional manpower .
- o Complex routing with multiple tees, bends, or junctions increases labor hours and coordination costs . For example, installing a 100 ft section of cable tray with multiple tees may require 6-9 hours of labor at rates around \$60/hour, depending on the tray type and site conditions .

Key Cost Drivers

- o Tray size and weight: Larger trays require stronger supports and more installers.
- o Installation height: Higher installations increase labor and equipment costs.
- o Project environment: Outdoor, corrosive, or industrial settings require more durable materials and protective coatings.
- o Complexity of routing: Multiple tees, bends, and junctions increase labor and coordination costs.

Summary

How much does it cost to install a cable tray tee

For a typical cable tray tee installation in a commercial or industrial setting, expect a total cost of \$35-\$100 per meter, combining material and labor. Using modular, snap-together systems or aluminum trays can reduce labor costs, while pre-galvanized steel is the most cost-effective for simple indoor installations .
