

How to waterproof and protect the distribution box

Preview

Choose a waterproof electrical box with a high IP rating, like IP66 or IP67, for reliable protection against heavy rain and humidity. Replace worn parts to maintain a tight seal. To make sure these boxes work well, the right waterproof levels must be in place. Superior insulation performance and professional sealing design are the core criteria for selecting qualified. Selecting and installing the right protective enclosure ensures long-term electrical safety in demanding environments. According to IEC standards, over 70% of outdoor electrical failures stem from improper mounting and faulty seal compression.
