

Article Overview

Huijue 48-core optical cables are available as standard fiber optic cables, but the specific reel number must be obtained directly from the manufacturer.

Huijue, through Shanghai Huijue Network Communication Equipment Co., Ltd, manufactures 48-core fiber optic cables suitable for telecom and network applications. These cables are typically used with fiber distribution boxes like the HJ-GF-KSW-48B, which supports fusion and optical distribution for 48 cores . The cables can be customized according to project requirements, including length, jacket type, and installation environment. To obtain the exact reel number or product code for a Huijue 48-core optical cable, you should contact the manufacturer directly via their sales email (sales@huadongcablegroup.com) or through their official website. They can provide the catalog number, reel specifications, and pricing based on your order requirements . Additional Notes:

- o Huijue cables are designed for both indoor and outdoor installations, depending on the model.
- o The 48-core configuration is standard for medium to large network deployments.
- o Customization options may include armored or non-armored cables, LSZH (Low Smoke Zero Halogen) jackets, and specific fiber types (single-mode or multi-mode). For precise ordering, always provide the manufacturer with your required core count, cable length, and installation environment, so they can assign the correct reel number and ensure compatibility with your network setup.

Outdoor Fiber Optic Cable Series ShengWei offers a complete range of outdoor optical cables including GYXTW (central tube),

48 core duct optic fiber cable, nearly starting at \$0.06, ideal for aerial OPGW installations. Steel tape armored GYTA cable, minimum

Fiber OSP cable, TeraSPEED®; Single Jacket/Single Armor, Gel-Free, 48 fibers, Stranded Loose Tube, Composite OM4 and

Huijue 48-core indoor optical cable MaxTools Photonics supplies advanced fiber optic solutions: fiber Bragg gratings, specialty fibers,

48 Core GYTY53 fiber optic cable is used for direct buried underground, it suit for long distance and LAN

A 48 core optical fiber cable is engineered for high-density data transmission, delivering a robust solution for modern communication
