

Internal components of the cabinet

Preview

The main components include the box or carcass, which forms the cabinet's structure; doors and drawer fronts that provide access; and interior elements like shelves, rails, and hardware. Cabinets are made up of several parts that work together to provide storage, support, and easy access. Each piece contributes to the structure and functionality of the cabinet. Whether you're planning a kitchen remodel, assembling ready-to-assemble (RTA) cabinets, or replacing hardware. Like all furniture, cabinets serve a specific purpose regarding organization and design in places such as the kitchen, living room, or bathroom.
