The thickness standard for galvanized (steel) Cable Trays is based on GB/T 14540-2020 "Cable Trays" (the latest national standard) and JB/T 10216-2013 "Cable Trays for Electrical Control and Distribution" (industry standard). IEC 61537:2023 specifies requirements and tests for cable tray systems and cable ladder systems intended for the support and accommodation of cables and possibly other electrical equipment in electrical and/or communication systems installations. The technical content of IEC publications is kept under constant review by the IEC.
