

Om3 Indoor Optical Cable Unit Price

Article Overview

OM3 indoor optical cables typically range from \$1.50 to \$3.50 per foot depending on strand count and vendor.

Pricing Overview

- o Fiber By the Foot offers 12-strand indoor OM3 plenum-rated fiber optic cable at approximately \$2.50 per foot, with options for indoor distribution or indoor/outdoor upgrades at no extra charge .
- o Amazon lists OM3 indoor/outdoor 6-core fiber optic cables with prices varying by length, generally around \$30-\$60 for 50-100 feet .
- o Mouser Electronics provides OM3 fiber optic cables with pricing dependent on configuration, strand count, and length; exact prices can be obtained by selecting the specific product on their website .
- o FS.com offers pre-terminated 6-fiber OM3 indoor cables, which are cost-effective for rack or panel interconnections, though pricing is typically quoted per unit and may vary based on length and connector type .

Key Considerations

- o Strand Count: Prices increase with the number of fibers (e.g., 6-strand vs 12-strand).
- o Length: Longer cables cost more; some vendors offer per-foot pricing.
- o Plenum Rating: Indoor plenum-rated cables are slightly more expensive due to fire safety compliance.
- o Indoor vs Indoor/Outdoor: Cables suitable for both environments may carry a premium.
- o Connectors: Pre-terminated cables with LC, SC, or ST connectors are more expensive than bulk cable. For accurate pricing, it is recommended to check the vendor's website for the specific strand count, length, and jacket type you need. Fiber By the Foot and Amazon provide convenient per-foot or per-length pricing, while Mouser and FS.com are better for bulk or pre-terminated solutions.
