

Article Overview

Open-type galvanized cable trays can be sourced from leading manufacturers like Eurostrut, Spina Group, Ogleand System, Metsec, and MP Husky, offering customizable sizes, standards compliance, and fast delivery options.

Key Considerations When Ordering

Material and Finish: Open-type cable trays are commonly made from hot-dip galvanized steel or pre-galvanized steel, providing corrosion resistance for indoor and outdoor applications. Some manufacturers also offer stainless steel or aluminum options for specialized environments . **Tray Types and Configurations:** Open-type trays include ladder, perforated, and wire-mesh designs, which allow for better ventilation and heat dissipation. Ladder trays are ideal for heavy cable loads, while perforated trays provide lighter support with good airflow . **Standards Compliance:** Ensure the trays comply with international standards such as BS EN 61537, UL, NEMA, or CSA, depending on your project location and requirements . Compliance ensures safety, durability, and compatibility with other cable management systems. **Customization and Accessories:** Many manufacturers offer custom widths, heights, and lengths, along with accessories like bends, tees, brackets, and grounding options. This flexibility allows integration with existing installations and accommodates thermal expansion . **Ordering Process:** Most suppliers provide online quote requests or direct contact with sales teams. For example, Eurostrut allows quote requests via their webshop, while Metsec and Spina Group offer CAD drawings and bespoke system design support . **Delivery and Support:** Leading manufacturers maintain high stock levels and provide on-time delivery, technical support, and after-sales assistance. MP Husky, for instance, emphasizes reliability and compliance with NEMA, UL, CTI, and CSA standards .

Recommended Manufacturers

- o Eurostrut: Offers hot-dip galvanized and stainless steel open trays, suitable for industrial and marine use, with flexible widths and configurations .
- o Spina Group (Schiavetti Tekno): Italian manufacturer providing ladder, perforated, and wire-mesh trays with custom sizes and full technical support .
- o Ogleand System: Wide range of galvanized trays and ladders for onshore and offshore projects, with comprehensive accessories .
- o Metsec: UK-based supplier offering pre-galvanized and hot-dip galvanized trays, full design services, and compliance with BS EN 61537 .
- o MP Husky: US-based manufacturer with hot-dip galvanized, mill galvanized, and wire mesh trays, meeting NEMA, UL, and CSA standards . When ordering, specify the tray type, material, dimensions, load requirements, and any accessories to ensure the manufacturer can provide a solution tailored to your project.
