The dual rate QSFP-100/112G-LR4 compatible QSFP28 optical transceiver module supports 100GBASE Ethernet and 4x28G OTN client interfaces throughput up to 10km over single-mode fiber (SMF) via duplex LC connectors. Use one of the options below to locate your desired product. Gigabyte. SFP modules also offers special feature, so called Digital Diagnostic Monitor Interface / Digital Optical Monitoring (or DDMI / DOM for short). This feature allows host devices (and by that the network administrators) for monitoring of some paramters of optical modules: supply voltage, transmitter. The MC230L is a media converter designed to convert between two gigabit SFP modules. It easily extends the distance of an existing gigabit network via fiber optic when integrated with the SFP Module. It converts optical light signal between different SFP modules, such as multi-mode and single-mode. A 1000BASE-SX SFP (Small Form-factor Pluggable) is a hot-swappable, compact optical module designed for Gigabit Ethernet (1000Mbps) communication. Click to get your 10G SFP+ transceiver modules from nearby warehouses.

FS.com - HPC, Data Center, Enterprise, Telecom

Compact sizes and lower power consumption made XFP optical modules well suited for high port density applications like high capacity switches and routers.

Choose the right 100g dual rate module by matching data rates, compatibility, and future-proofing your network for seamless upgrades in 2025.

Use one of the options below to locate your desired product. Max. Speed of Optical Port.

The SFP-1G-SX module is a proven, reliable, and cost-effective solution for 1 Gigabit short-range fiber optic connectivity. Understanding its

The MC230L is a media converter designed to convert between two gigabit SFP modules. It easily extends the distance of an existing gigabit network via fiber optic when integrated with the SFP Module.

The GEZHI Photonics 10GBASE DWDM SFP+ Modules are fiber transceivers for a wide variety of any brand switches, routers, and other equipment. They allow enterprises and service providers to

The ViaLiteHD Gigabit Ethernet fiber optic link provides highly reliable, full duplex transmission of Ethernet signals over two single-mode optical fibers for distances of 1 m to 50 km.

Next ETU link will give you a detailed introduction to the types of gigabit optical module. Gigabyte optical

# Optical Module Gigabit Dual Link

modules can be divided into two categories, namely, single fiber and dual fiber

Cisco SFP Modules for Gigabit Ethernet Applications Cost-effective Small Form-factor Pluggable (SFP) transceivers for Gigabit Ethernet applications Product Overview The industry-standard Cisco® Small

These modules convert electrical signals from network switches/routers into optical signals for transmission over fiber cabling and vice versa, enabling high-bandwidth, low-latency

Supports link lengths of up to about 80 km on SMF. This interface is not part of the 10 Gigabit Ethernet standard but is built according to Cisco optical

About this item What You Get: 1x Gigabit SC to RJ45 Media Converter, 1x external power supply, 1x Product Manual; We provide 24/7 Customer Service, 30 Days Free-returned, 3 Year Free Warranty and Lifetime Technology Support 1G Dual SC Fiber Port: Built-in 1000Mbps Single-mode Fiber Module with dual SC

The Dahua GSFP-1310T-20-SMF is a gigabit optical module with LC port, single fiber design, and 20 km range for reliable long-distance CCTV connectivity.

The MC230L is a media converter designed to convert between two gigabit SFP modules. It easily extends the distance of an existing

The 2A-141G 10G Multi-Mode/300M Fiber SFP+ Module is designed for use in 10GbE Ethernet environment that allows you to connect a multi-mode Gigabit Ethernet network cable to a network
