

Outdoor cable trays or cable ducts are better

Preview

Cable tray provides easier, tool-less cable organization ideal for evolving setups, whereas cable ducts suit permanent arrangements. Open-slot trays enhance accessibility, adaptability, and airflow, proving superior for frequent modifications and heavy-duty applications. If you're working on an electrical project, you've likely asked yourself this: Should I use a cable duct or a cable tray? It's a common question. People worry about which system is safer, more cost-effective, and easier to install. However, they are not interchangeable. NEC Article 392 recognizes these types: Ladder tray - Two side rails. On large-scale projects, cable trays will be the most appropriate since they are robust and allow air to circulate to the wires.
