

Price List of Steel Cable Trays in Lebanon

Article Overview

Steel cable tray prices in Lebanon typically range from \$15 to \$50 per meter, depending on material, size, and finish.

Factors Affecting Cost

- o **Material Type:** Steel cable trays can be pre-galvanized, hot-dip galvanized, stainless steel, or aluminum. Stainless steel and hot-dip galvanized trays are more expensive due to corrosion resistance and durability .
- o **Tray Design:** Options include solid-bottom, ventilated, or wire mesh trays. Wire mesh trays (like Cablofil) are lighter, easier to install, and often cost slightly more per meter due to flexibility and patented designs .
- o **Size and Load Capacity:** Tray width, height, and load rating (light, medium, heavy duty) influence price. Heavy-duty trays for industrial or high-load applications are more expensive than standard trays .
- o **Finish and Coating:** Surface treatments such as hot-dip galvanization, powder coating, or stainless steel grades (304L, 316L) affect cost. Outdoor or corrosive environments require higher-grade finishes, increasing the price .
- o **Accessories and Installation:** Bends, tees, supports, and suspension systems add to the total cost. Quick-fix systems or toolless accessories can reduce labor costs but may slightly increase material cost .

Typical Price Range

- o Standard steel cable trays: \$15-\$25 per meter
- o Heavy-duty or hot-dip galvanized trays: \$25-\$40 per meter
- o Stainless steel trays (304L/316L): \$35-\$50 per meter Prices can vary depending on supplier, order quantity, and shipping within Lebanon. Local suppliers include SFSP Lebanon, Legrand Lebanon, Tramsteel, and Metas Lebanon .

Recommendation

For accurate pricing, it is best to contact suppliers directly with your project specifications, including tray type, dimensions, load requirements, and finish. This ensures you receive a precise quote and can compare options for cost-effectiveness and compliance with local standards .
