

Article Overview

Wire mesh cable trays typically range from \$20 to \$150 per meter or section, depending on material, size, and finish.

Overview of Mesh Cable Trays

Wire mesh cable trays, also known as basket trays, are designed to support and organize cables while allowing ventilation to prevent overheating. They are commonly used in industrial, commercial, and photography setups where multiple cables need to be routed neatly . These trays are lightweight, flexible, and can be cut or bent to accommodate complex cable runs .

Material and Finish Options

- o Stainless Steel (SS304 / SS316): Offers high corrosion resistance and durability, ideal for long-term installations .
- o Electro-Galvanized Steel: Provides moderate corrosion protection at a lower cost .
- o Aluminum or Fiberglass: Lightweight options suitable for environments where heat dissipation is important .

Pricing Estimates

- o Small sections (50x100 mm): Approximately \$20-\$40 per section for electro-galvanized steel .
- o Medium sections (150x200 mm): Around \$50-\$80 per section, depending on material and coating .
- o Large or heavy-duty trays: Stainless steel or HDG trays can cost \$100-\$150 per meter . Prices may vary based on supplier, bulk orders, and additional accessories such as clamps, covers, and suspension systems . Some suppliers, like McMaster-Carr and Grainger, offer same-day delivery and detailed product specifications for easier selection .

Additional Considerations

- o Ventilation: Wire mesh trays allow airflow, reducing heat buildup for sensitive cables .
- o Flexibility: Can be bent or cut to fit curves, slopes, or tees in cable runs .
- o Compatibility: Works with ceiling mounts, wall brackets, and floor installations .
- o Warranty and Certification: CE-certified trays often come with a 10-year guarantee and free samples for industrial applications . For photography setups, choosing lightweight, corrosion-resistant trays with easy installation features ensures both safety and cable organization. Bulk orders or custom sizes can often be requested directly from suppliers like EAE Electric, Grainger, or Alibaba for competitive pricing .
