

Article Overview

Cable tray bends in Saudi Arabia vary in price depending on material, size, and type, with FRP/GRP and steel options widely available from local suppliers.

Overview of Cable Tray Bends

Cable tray bends are essential components for routing cables around corners, vertical risers, and complex layouts. Common types include:

- o Horizontal bends (90° and 45°)
- o Vertical bends (inside and outside risers)
- o Reducers (right-hand, left-hand, straight)
- o Tees and crosses (horizontal and unequal) These bends are available in materials such as galvanized steel, stainless steel, aluminum, FRP, and GRP, each offering different durability, corrosion resistance, and cost characteristics .

Price Factors

The cost of cable tray bends in Saudi Arabia depends on several factors:

- o Material: FRP/GRP bends are generally more cost-effective and corrosion-resistant compared to stainless steel or hot-dip galvanized steel .
- o Size and thickness: Larger widths (e.g., 600 mm, 800 mm) and thicker materials (1.0-2.0 mm) increase the price .
- o Type of bend: Complex fittings like tees, crosses, and reducers are priced higher than standard 90° or 45° bends .
- o Certifications: UL-certified or NEMA-compliant products may carry a premium due to quality assurance .
- o Supplier and delivery: Prices vary by supplier, with options for bulk orders, fast delivery, and project-specific customization .

Estimated Price Ranges

While exact prices fluctuate based on supplier and project requirements, typical ranges in Saudi Arabia are:

- o FRP/GRP horizontal or vertical bends: SAR 150-400 per piece depending on size and thickness .
- o Galvanized steel bends: SAR 200-600 per piece for standard 90° or 45° bends .
- o Stainless steel or heavy-duty industrial bends: SAR 500-1,200 per piece, especially for large widths or custom designs . For precise pricing, suppliers like Youmats, Arabian Gratings, and Hitech Fence provide

custom quotes based on your Bill of Quantities (BOQ), material choice, and project specifications .

Procurement Tips

- o Request quotes from multiple suppliers to compare prices and delivery options.
- o Specify material, size, and type of bend to get accurate pricing.
- o Consider bulk orders for cost savings.
- o Ensure bends meet international standards (UL, NEMA, BS/IEC) for safety and durability . By considering these factors, you can select the most suitable cable tray bends for your project while optimizing cost and performance.

150 to 350 SAR - Surface Mounted Cable Trays / Surface Wiring : Shop online for a large selection of top brands in Saudi at best
