

Price of covering indoor electrical distribution boxes

Article Overview

Indoor electrical panel covers typically cost between \$40 and \$175, with installation adding \$100-\$300 depending on complexity.

Retail Prices for Panel Covers

Indoor electrical panel covers are available in various sizes and brands. Common options include:

- o Eaton CH Surface Loadcenter Cover: \$43-\$73
- o Square D QO 30-42 Space Indoor Load Center Covers: \$53-\$112
- o Leviton NEMA 1 30-66 Space Covers: \$63-\$173 These covers are designed for flush or surface mounting and may include windows for observation or combination doors for added safety and convenience .

Installation Costs

If you hire a licensed electrician to install or replace a panel cover, labor typically ranges from \$100 to \$300, depending on the panel size, accessibility, and whether minor wiring adjustments are needed . For a standard 100-125A indoor panel, a basic cover installation is usually straightforward and may take 1-2 hours.

Additional Considerations

- o Material: Covers are usually metal or durable plastic; metal covers are more robust and may cost slightly more.
- o Permits: Some local codes require permits for panel modifications, which can add \$50-\$150.
- o Upgrades: If the cover is part of a panel upgrade or replacement, total costs including labor and materials can range from \$600 to \$2,500 for standard residential indoor panels .

Summary

For a typical indoor electrical distribution box, you can expect to pay \$40-\$175 for the cover itself, with professional installation adding \$100-\$300. For full panel upgrades or more complex installations, total costs may rise to \$600-\$2,500 depending on amperage, panel size, and local labor rates .
