SC / APC fiberglass connectors are equipped with angular polishing of the ferrule end face, which allows the optical fiber to be connected with considerable precision and minimum losses. Unlike fiber splicing, which is permanent, connectors allow for easy connection and disconnection of cables, making them ideal for maintenance and flexibility in. SC fiber connectors, or Subscriber Connectors, are widely used in telecom and networking for their strong performance and easy handling. They're known for a secure push-pull connection that's quick to insert and remove. Ensures low return loss (minimal light reflection back into. We offer high-quality SC connectors designed for dependable, low-loss performance in data centers, telecom, and enterprise environments. Avoid scratching the surface.
