Chongqing Weiyun Technology Development Co. (Wingoil), founded in 2010, is one high-tech enterprise dedicated to R&D, manufacturing ultra-high pressure fluid equipment for pressure boosting, testing and injecting, and other specialized machinery for gas&oil field and other industries. HARSHU offers a complete range of Tube fittings and adapters for high pressure applications, specially designed to match the performance of high-pressure valves and tubing. The C808-OKDW kit includes the popular 808 series medium pressure oil reel, along with a choice of 3:1 or 5:1 ratio oil stub pumps with a 2m pump to reel. Backed by the extensive capabilities of High Pressure Equipment and SC Pumps, we can develop a range of high pressure systems for applications such as pressure testing or actuation of valves and blow-out preventers.

Wingoil provides high pressure and flow control custom-engineered solutions in the Oil & Gas industry. Cutting-edge designs, quality, and rugged durability have won us a worldwide reputation as a first

High-pressure pumps and systems from Maximator allow reliable testing of pressurised hydraulic equipment and components in oil and gas drilling and

Explore our upstream and subsea oil & gas solutions to find the right equipment for your application, or speak directly with a Haskel specialist for expert guidance

The petrochemical industry is responsible for the treatment and transformation of oil and natural gas. Petrochemical plants use specific chemical processes that

HARSHU offers a complete range of Tube fittings and adapters for high pressure applications, specially designed to match the performance of high-pressure

Hydrostatic shop test units are one of the most widely used processes for precisely testing pipes and pressure

Backed by the extensive capabilities of High Pressure Equipment and SC Pumps, we can develop a range of high pressure systems for applications such as

Measurement technology for refining and petrochemical This brochure presents examples of applied level and pressure measurement technology. Here, you'll learn which sensors fit which measuring

Petrochemical refineries consist of complicated units that refine raw materials like crude oil and natural gas to manufacture a large number of useful products such

All-welded and fully accessible, the Compabloc can handle tough duties that need high pressures and temperatures. It can even cope with the most aggressive

Demanding environments and processing equipment in the Petrochemical and Refinery industry require thermal management and passive fire protection products and systems designed and developed

The oil and gas industry is a complex and multifaceted sector that relies heavily on various types of equipment to ensure efficient and safe operations. All the
