

Where in Southern Europe can I buy fireproof cable trays

Article Overview

Fire-resistant cable trays from Southern Europe are available from multiple manufacturers, including DKC Europe, Meka Pro, HERMI, Beerenberg, and Eurostrut, offering tested and certified solutions for critical electrical installations.

Key Suppliers and Products

DKC Europe offers a wide range of cable tray systems suitable for civil and industrial infrastructures, including fire-resistant options, with comprehensive support for installation and energy distribution projects . Meka Pro specializes in fire-resistant cable support systems tested according to EN 1363-1 standards. Their products include over 1,200 fire-tested solutions, ensuring that electrical circuits remain operational during fires (E60/E90 ratings) and that cable trays maintain structural integrity without producing toxic fumes . HERMI provides standard and lightweight fire-resistant cable trays designed for surface cable laying. Their systems are intended for constructing fire-resistant cable paths and come with expert guidance for selecting the right solution for specific project requirements . Beerenberg offers the Benarx Epoxy Cable Tray, a prefabricated system for passive fire protection. It features epoxy-coated perforated steel panels, quick installation, and the ability to maintain cable integrity under fire conditions. The system is robust, reusable, and suitable for all weather conditions . Eurostrut supplies industrial and marine cable trays, including distribution trays and NATO-type models, which can be requested via their webshop for European delivery .

Fire Ratings and Standards

Most of these European suppliers provide cable trays tested for E60 or E90 fire resistance, meaning the electrical circuits remain functional for 60 or 90 minutes during a fire. Products comply with EN 1363-1 and other international standards, ensuring safety and reliability in critical installations .

Installation and Support

These manufacturers offer installation guidance, technical support, and optional services such as on-site training, measurement, supervision, and project management. Prefabricated designs like Beerenberg's Benarx system allow for quick assembly and maintenance, reducing long-term costs .

Conclusion

Fireproof cable trays from Southern Europe are readily available and come in a variety of designs, materials, and fire ratings. Suppliers like DKC Europe, Meka Pro, HERMI, Beerenberg, and Eurostrut provide tested, certified, and cost-effective solutions suitable for industrial, commercial, and critical infrastructure projects,
