First, please check that the optical cable which comes through your wall into the ONT hasn't become loose. Now turn the ONT off and on again from the main socket on the wall. Still No Luck? The other building has a VSETH-SWF Gigabit fibre 9-port switch. I suspect it might be a single-mode SFP, as I wouldn't see. Based on typical issues encountered with optical modules in daily switch applications, this document summarizes basic troubleshooting steps for resolving common faults: 1. Check compatibility between the optical module and switch. Most switch brands have specific compatibility requirements. There is a single mode optical fiber cable in our datacenter going from a Cisco N5K to another N5K across different racks. The link appears to be dead and I'm hoping to fix it, but I have little to no experience with fiber.
